Site performance

This page shows you performance statistics of your site. You can use this information to improve the speed of your site and create a faster experience for your users. [Learn more](#)

Performance overview

On average, pages in your site take **7.0 seconds to load** (updated on May 26, 2010). This is **slower than 86% of sites**. These estimates are of **high accuracy** (more than 1000 data points). The chart below shows how your site's average page load time has changed over the last few months. For your reference, it also shows the 20th percentile value across all sites, separating slow and fast load times.

Example pages

These are some example pages from your site and the time that they take to load in a browser (in seconds).

URL	Load time
/pages/meetings/cbodies_en.html	12.2
/	7.8
/pages/members/region6_en.html	1.2
/pages/index_en.html	6.0
/search	2.0
/pages/members/index_en.html	3.7
/pages/themes/weather/index_en.html	2.5
/pages/vacancies/index_en.html	1.7
/pages/prog/www/index_en.html	2.8
/pages/mediacentre/news/index_en.html	5.2

Page Speed suggestions

These are some example pages from your site and some suggestions on how to optimize them, based on the [Page Speed](#) tool.

NOTE: These suggestions are based on Googlebot's view of the page. It is possible that resources are served differently to your site's users, in which case some of these suggestions may not be applicable. For better results, please install and run the Page Speed extension for Firefox yourself.
