

7th WMO International Workshop on Tropical Cyclones

15 – 20 November 2010

To be held at the Hotel Le Recif,
Saint-Gilles-Les-Bains, La Réunion, France

ABOUT THE EVENT

The IWTC is one of WMO's major quadrennial workshop series organized by its World Weather Research Programme (WWRP) and Tropical Cyclone Programme (TCP). It is a special and unique gathering of tropical cyclone researchers and warning specialists from all regions affected by tropical cyclones, including those from Members belonging to the WMO TCP regional bodies. The main objectives of these workshops are 1) to examine current knowledge, forecasting and research trends on tropical cyclones from an integrated global perspective and 2) to report on these aspects and to offer recommendations for future forecasting studies and research with special regard to the varying needs of different regions.
