Role of WMO
Roles of WMO

WMO will be the primary liaison with participating NMHSs and the designated regional Centre, intends to perform the following activities:

- Provide technical and administrative assistance for the design, development, implementation, and operations of the regional CAFFG project as a part of the global Flash Flood Guidance System;

- Provide support in the design and implementation of flash flood hydrometeorological training activities (Step 1-5 training), including on-line training;

- Provide support in the development of operations concepts for inclusion of the FFG diagnostic tool into current National Meteorological and Hydrological Services operations;
Role of WMO (Continued)

- Provide support in developing collaborations between the National Meteorological and Hydrological Services and Disaster Management Agencies;
- Provide support in developing regional collaborations and cooperation between the National Meteorological and Hydrological Services and the Regional Centre;
- Provide support in the use of the WMO Global Telecommunications System (GTS) and WMO Information System (WIS) for data access and dissemination;
Role of WMO (Continued)

- Encourage, where appropriate, cooperation and inter-operability of the CAFFG project with other national and regional projects;
- Ensure integrity of the project with other regional implementations of the Flash Flood Guidance projects;
- Ensure full integration of the CAFFG project in the WMO Flood Forecasting Initiative; and
- Facilitate the use of products and information generated in aggressively reducing exposure to disaster risk and improving disaster risk management in participating countries.
