

World Meteorological Organization

Working together in weather, climate and water

Observing Requirements Database

Nils Hettich
WMO Space Programme
Geneva, Switzerland

Observing Requirements DB

- Official repository of requirements for observation of physical variables in support of WMO Programmes
 - Foundation of the **Rolling Requirements Review (RRR)** process
 - Component of the future integrated *Database of Observational User Requirements and Observing System capabilities*
-

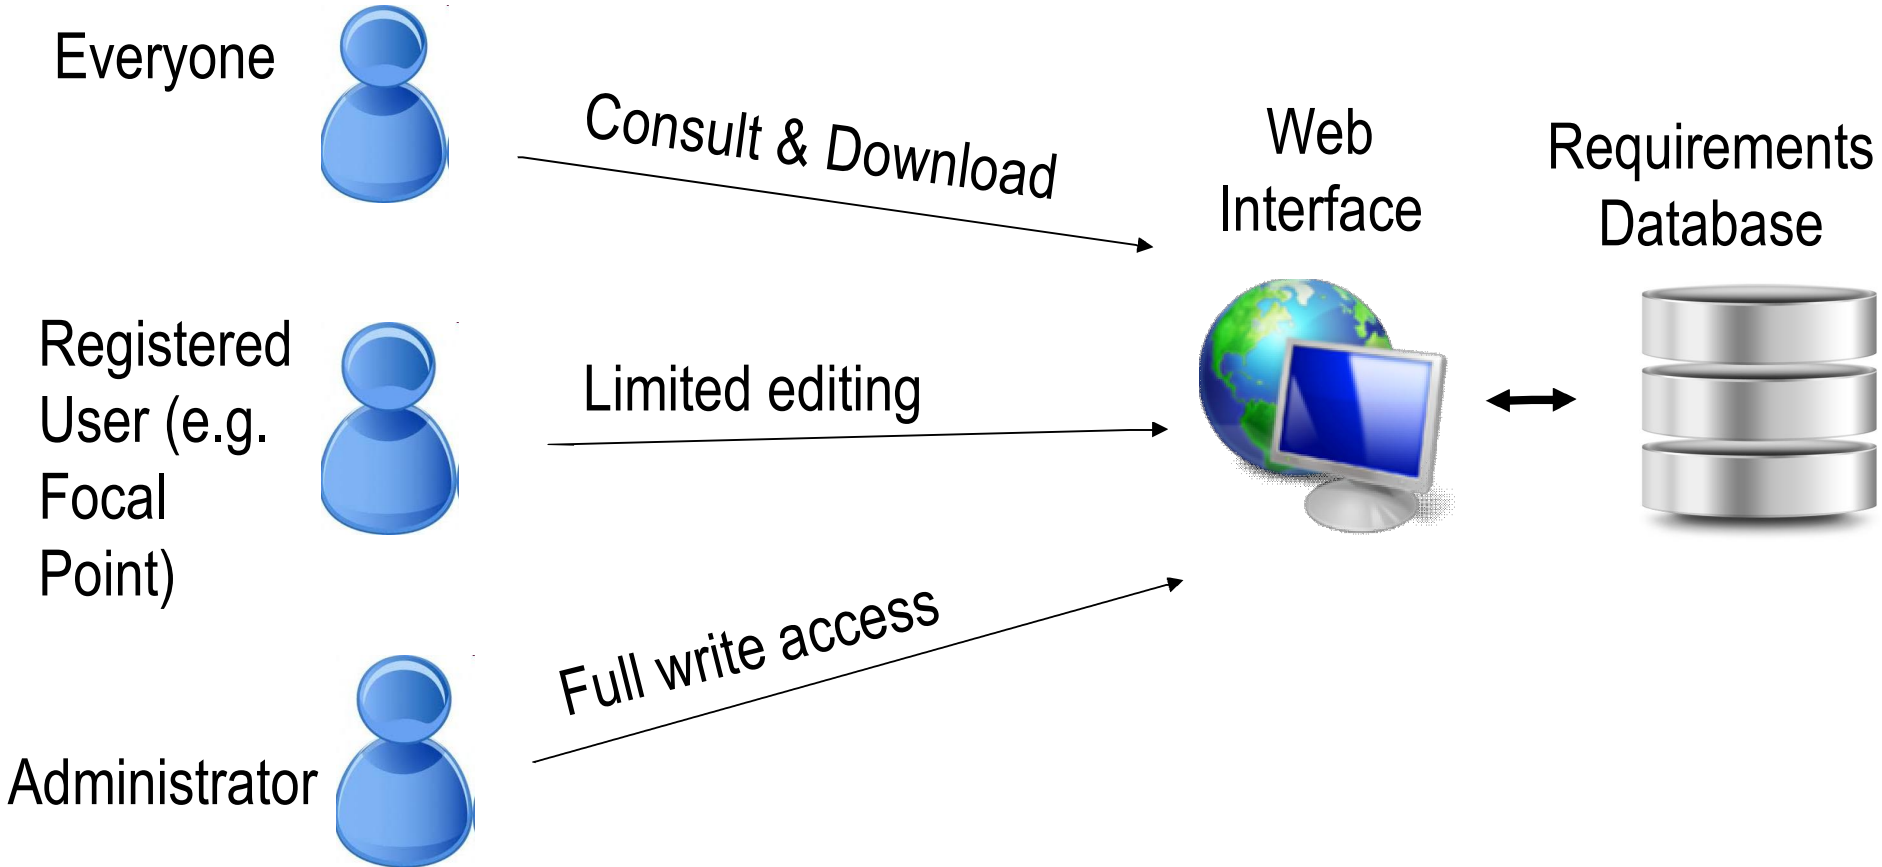

Motivation / Goals

- Improve access / usability via Web-Interface
- Central administration
- Facilitate updates by multiple users

Functionality

Demonstration

- <http://www.wmo-sat.info/db>
