

Satellite data use and impact assessment at UK MetOffice

(Submitted by Simon J. Keogh)

Summary and Purpose of Document

A short presentation will be given on satellite changes to the UKMO NWP forecasts system since the last ET-SUP. In addition, some time will be spent describing plans for the future utilization of geostationary satellite data in both forecasting and NWP. These plans will require global cooperation between both providers and distributors of these data in order to leverage the benefits from these forthcoming missions.

ACTION PROPOSED

The eighth session is invited to:

- (a) Note the forecast impact of satellite changes to the Met Office NWP system;
 - (b) Note future UKMO plans for the utilization of geostationary satellite data from new missions.
-
