The idea of the I-DARE Portal

to provide a **single point of entry** for information on the status of past and present worldwide **to be rescued data** and **data rescue projects**, on **best methods and technologies** involved in data rescue, and on **metadata** for data that need to be rescued.

The portal aims to **stimulate new DARE activities** and promote **discoverability** of, and **convergence** between, existing DARE activities.

The International Data Rescue (I-DARE) Portal

This International Data Rescue (I-DARE) Portal provides a single point of entry for information on the status of past and present worldwide to be rescued data and data rescue projects, on best methods and technologies involved in data rescue, and on metadata for data that need to be rescued.

For a map of the projects see below. For a list of the projects see [here](#).

Click on the markers on the map for more information.

Ongoing work

- Populating the portal through country focal points nominated by PRs of WMO-Members
- Improve the portal based on WMO-Members and others' feedback
- Liaise with the DARE community (e.g. in C3S) to populate the Portal
- Updating Guidelines on Best Practices for Climate Data Rescue
- Writing Guidelines to facilitate Members' input into I-DARE
