

# El Niño /La Niña Update

## ESTIMATED ENSO PROBABILITIES FOR JUNE-AUGUST 2019

- Borderline to weak El Niño conditions present in April-May 2019
- Model predictions and expert opinion indicate a **60-65% chance** that a **weak El Niño will be present** during the next three months
- A **strong El Niño unlikely**
- **La Niña** development is **extremely unlikely**

Information on ENSO should be combined with other regionally and locally relevant factors in order to anticipate its effects on regional climates.
