RA IV HURRICANE COMMITTEE

Forty-first Session

Curaçao, 18–22 March 2019

RA IV/HC-41/Doc. 3.2(16)

Submitted by:
Members of the RA IV
Hurricane Committee

5.III.2019

Original: Spanish

AGENDA ITEM 3: REVIEW OF THE PAST HURRICANE SEASON

ITEM 3.2: COUNTRY REPORTS

AGENDA ITEM 3.2(16): PANAMA

1. Impacts related to tropical cyclones or other extreme weather events

During the 2018 hurricane season, Panama was not directly or indirectly affected by any tropical system.

2. Coordination with emergency managers and other interested parties

Direct coordination was maintained with the National Civil Protection System due to rains and wind gusts caused by tropical waves, an estimated 13 of which moved over our territory, as well as the activation of the Panama Low and the Inter-Tropical Convergence Zone.
